

May need to switch to BMI270 due to availability

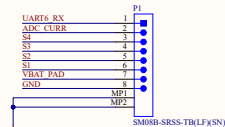

Blackbox SD Card, SDI/SDO are MOSI MISO

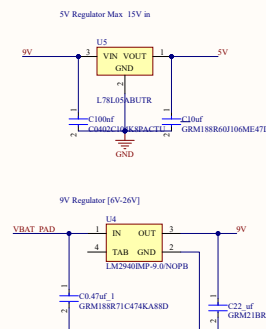

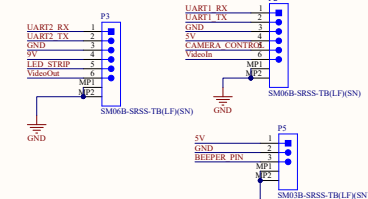

STM32F Data (Originally drone mesh, but switched pinout used to JBF7 V2 betafight-master/src/config/JBF7_V2/config.h)

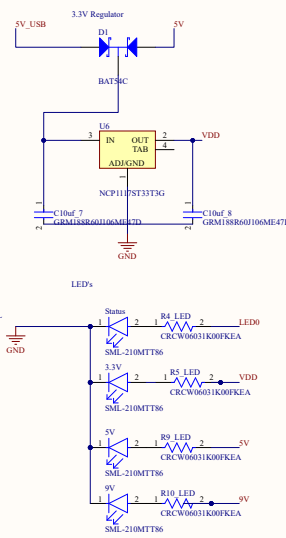

TODO: USB detect not connected

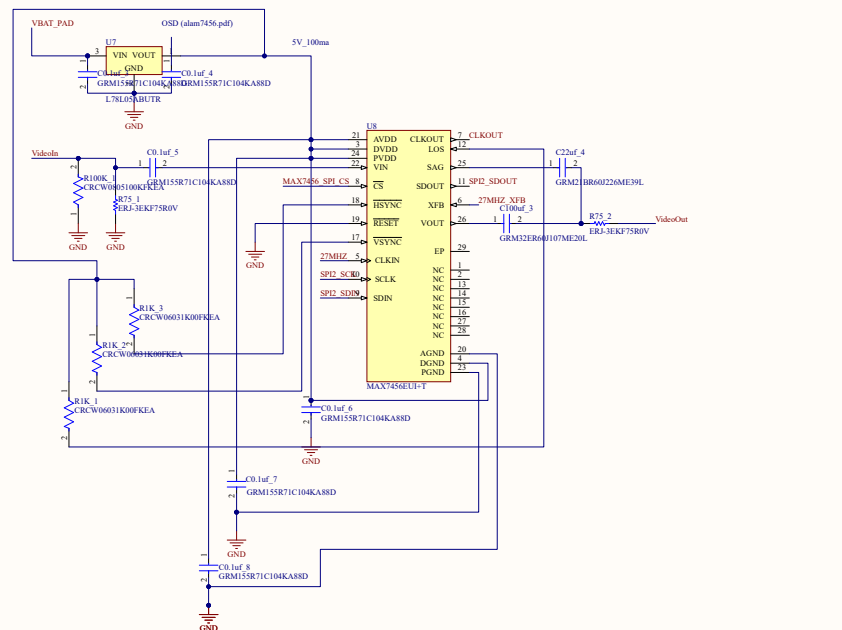

Really would prefer some 4 pin headers, but didn't see any

Todo: Higher amperage 9V regulator for Digital VT2

Betaflight status light? (blinks usually)
